Invalid argument supplied for foreach() in **/modules/mod_moedesigns_moescroll_15_advanced/tmpl/scroller_XXXXXX.php** on line **134**

Solution: Upgrade to the newest version!

This error is normally due to not having an Article selected in the "Single Article" selection box but the "Pull Content From" option is set to "Single Article". In the newer versions of MoeScroll Advanced you will get a nice neat message asking you to check your settings instead of receiving this ugly php error.
